

b. Economic Intelligence Subcommittee (EIS)  
of the NSCIC

USIB-M-680

~~Approved For Release~~ 2004/08/31 : CIA-RDP79M00098A000400030005-0

Mr. Colby said he wished to call attention to the establishment of this subcommittee to be chaired by Mr. Charles A. Cooper, Treasury's Assistant Secretary for International Affairs. He advised that the NIO for Economics and Energy, [ ] would serve as Executive Secretary, and Mr. William Morell, Jr., the USIB Representative from Treasury, would serve as Vice Chairman. Mr. Colby said this will be a largely consumer-oriented subcommittee representing those departments and agencies concerned with economics. In addition the Chairman of the EIC of USIB will be a member. Mr. Colby said that the NSCIC Subcommittee will treat economics from the consumer point of view whereas the EIC of USIB will concern itself largely with collection and production. Mr. Morell, noting that the State Member of the EIS was not from INR, suggested that an additional member from that organization might be useful. General Graham observed that the primary consumer of economic intelligence in DoD is the Office of International Security Affairs and suggested consideration be given to having a representative from that office on the EIS.
